I bought a used m7040 kubota been using it to load hay and everything seems to work just fine. Now it's time to plant some rye grass. When I try to hook up my implements to the 3pt. hitch the lift will not raise high enough to hook up. 3pt. hitch seems to work just fine, when I lower it drops to the ground and when I raise it comes up just fine but not high enough. There are different variants of the ZD326, see F.A.Q. The parts listed below are for ZD326P. Please call Messicks with the serial number to verify the proper parts to fit other variants. This is great, just downloaded the parts book for my B7800....
