

# Download Study Guide Biochemistry Test

Creating your MCAT study guide is one of the most important aspects of preparing for the MCAT, but it can also be one of the most difficult. The AAMC recommends that the average pre-med student spend between 300 and 350 hours over several months preparing for the MCAT. Increase your knowledge of the topics you'll be tested on when you take the CLEP Biology exam with this study guide course. You can use the short... Biochemistry is the study of the chemical processes that take place in living organisms. This broad definition of biochemistry means that the job of a biochemist can encompass a wide range of scientific topics, including stem cell research, genetic research, immunology, pharmacology, forensics, cancer research, environmental science and food science.
